OZ CHOKS®

FSP Oz Products is the manufacturer in Australia of **OzChok®** wheel chocks in a range of sizes and configurations.

OzChok® wheel chocks are a **one-piece construction**, moulded from polyethylene. As a result, **OzChok®** wheel chocks can withstand wear and tear owing to their lightweight and UV stable properties. When exposed to sun or high temperatures, **OzChok®** chocks won't crack, split or break.

Additionally, **OzChok®** wheel chocks are resistant to the damaging impacts of humidity, moisture, salt, water, air, oil and temperature fluctuations.

With sturdy rubber feet, **OzChok®** wheel chocks provide additional tyre grip to vehicles and heavy farming equipment parked on a steep or slippery slope..
