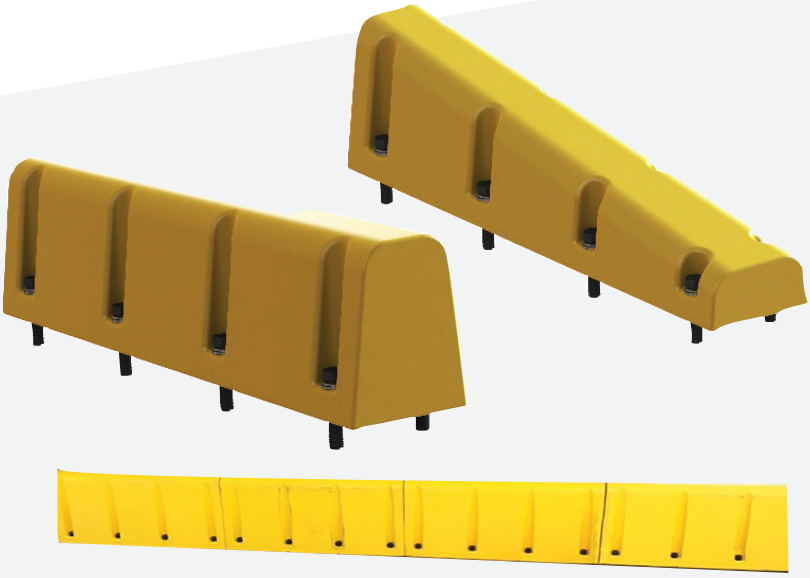
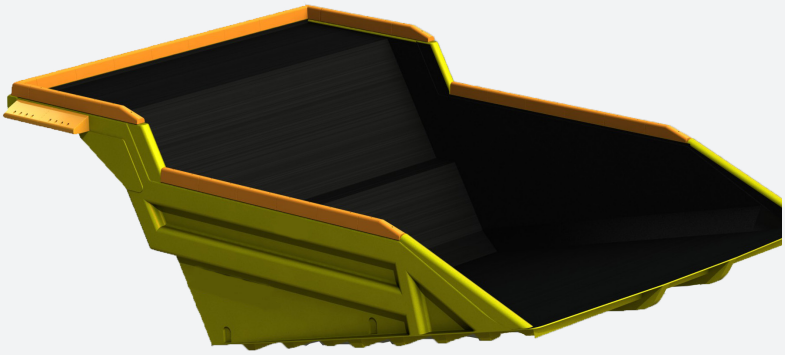
HUNGRY BOARDS

"Better visibility at night, less chance of rocks spillage"



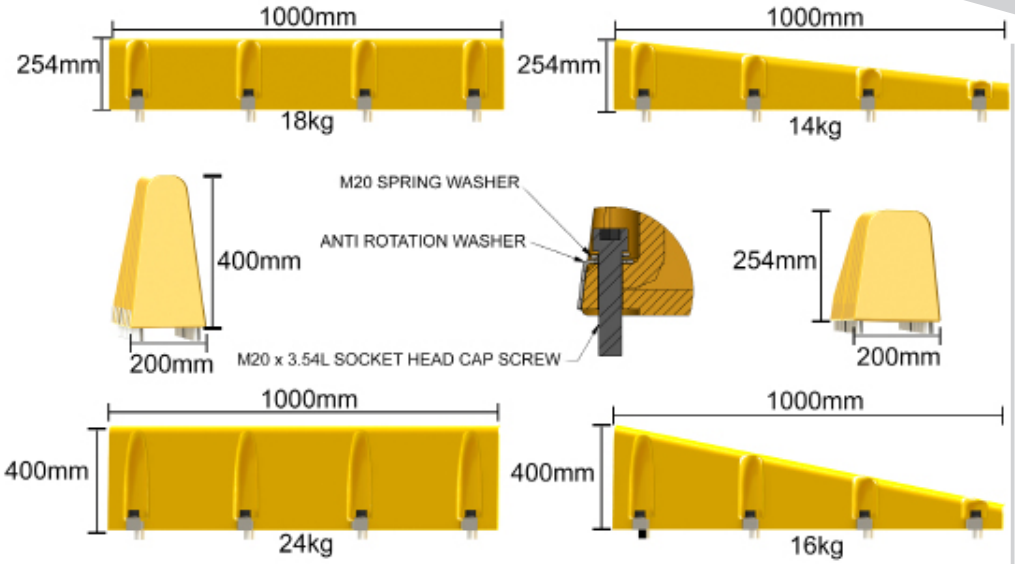
Hungry Boards® & Head Boards

- Reduce Weight
- Increase Payload
- Helps Reduce Rock Damage
- Lightweight & Easy To Replace
- Weather Resistant
- Hi-Vis Polyethylene



"They have been a great success in reducing accidental damage and has reduced down time"

Hungry/Head Boards available in multiple sizes



In the unlikely event of damage, only the damaged section needs replacement. Each section is a simple one-person in-field replacement. No Hot Work Permit is required. Downtime is minimal, as the vehicle does not need moving off-site.

Hi Vis Yellow Polypropylene Hybrid

Lighter than traditional steel FSP's polyethylene Head Boards significantly aid in reducing the damage by the material transported and they allow you to increase payload and help in the reduction of damage, thus maximising the potential of your haul truck.

They are manufactured from our Hi-Vis yellow polyethylene hybrid and are UV stabilised and robust.
